**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Specification*

The abstract of the disclosure is objected to because of the use of phrases, which can be implied, such as "is disclosed" on line 1, which should be avoided. Correction is required. See MPEP § 608.01(b).

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Packard (U.S. Patent No. 5,735,400).

With respect to Claim 1, Packard, Figures 1-11, teaches a roll dispenser 12 comprising a single piece having a first panel 14, a front panel 34, a second panel 24, said first panel having a protruding pin 18, said second panel having a protruding pin 28, wherein a distal end of said protruding pin of said first panel and the distal end of said protruding pin of said second panel fixedly engage providing support for the roll.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Packard as applied to claim 1 above, and further in view of McWilliam (U.S. Patent No. 777, 044).

With respect to Claims 2-5, Packard is advanced above. Packard teaches all the elements of the roll dispenser except for each panel having hooks along the edges. McWilliam, Figures 1-3, teaches hooks along edges. It would have been obvious to one of ordinary skill in the art to provide Packard with hooks, as taught by McWilliam, for the purpose of allowing hands-free operation of the dispenser.

### *Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
